Dr. Fazio: Friday

Antibiotics in Dentistry: Dr. Fazio will discuss the changing antibiotic options in dentistry for acute infections and prophylaxis for old and new antibiotic categories and formulations. The current American Heart Association at-risk patients and inconsistencies with the ADA/Orthopedic Surgeons 2014 recommendations will be discussed. What is the recommended for patients already on, or recently on an antibiotic? New data and designs dictate a new approach to cardiac and vascular stents.

You will discover the bottom line on prophylaxis for vascular repairs; the four approaches to renal dialysis; IVC filters; Hickman catheters; portacaths; and VA vs. VP hydrocephalus shunts. You will also learn which medical conditions affect Antibiotic selections.

Medicines, Medicine and Dentistry: The speaker will cover the aging population and its’ myriad of medical problems and physician-prescribed medications. Medical issues such as Diabetes Mellitus, hypertension therapy, anticoagulant therapy, and drugs for many cardiovascular diseases directly affect dental treatment planning and prescriptions written by dentists. This course will provide dentists with a framework for choosing antibiotics, analgesics, local anesthetics and other top-50 dental prescriptions in the context of potential drug-drug interactions and disease related complications of medically compromised patients.

As medicine advances, so does its’ complications and challenges faced by dentists in managing these patients. These medically oriented lectures are a “must see” presentation in order to stay up-to-date with the ever-changing demands placed on dentists to navigate our patients’ medical conditions and their physicians’ attempts to manage those conditions. Are you current on these issues?

Please join us in this stimulating presentation so that you can confidently start managing the ever-growing population of challenging patients.

WAYNE PULVER, DDS

Saturday, May 6, 2017

Dr. Wayne Pulver received his Certificate in Endodontics from the Harvard School of Medicine in 1976. He received his DDS degree in 1973 from the University of Toronto and thereafter interned at the Beth Israel Hospital in Boston from 1973 to 1974. He maintains a private-endodontic practice in Toronto, Ontario. Dr. Pulver is the past head of the endodontic section of Mt. Sinai Hospital, Toronto. He has served as President of the Ontario Society of Endodontists, Canadian Academy of Endodontists, George Hare Endodontic Study Club as well as the Ontario Dental Association. He has received numerous awards including the University of Toronto Dental Student Society Award, the Endodontic Research Memorial Award of the American Association of Endodontists, Alumni of Distinction Faculty of Dentistry University of Toronto, Ontario Dental Association Service Award, the Distinguished Service Award of the Canadian Dental Association and the Barnabus Day Award from the Ontario Dental Association. Dr. Pulver has lectured extensively and authored numerous clinical and scientific articles in endodontics and is a certified lecturer and member of the Real World Endo Board of Advisors.

Dr. Pulver: Saturday

Real World Endo® presents Endo-Restorative Synchronicity Full-Day Presentation (Lecture and Hands-On Session)

Endo-Restorative Synchronicity (ERS) is based on minimally invasive root canal preparations and bio-ceramic bonded obturation that enhances the long-term prognosis of the tooth. It (ERS) is based on a biologic approach that emphasizes debridement and disinfection rather than merely shaping for obturation. This Real World Endo presentation is highly practical and will utilize a “Case Based Learning Approach.” Basic and Advanced Techniques will be discussed in detail. Biologic principals for successful endodontics will be presented as well as the introduction of new technology and techniques. A game-changing instrumentation and obturation system (ESX®) will be introduced that incorporates the above concepts. Furthermore, all participants will have the opportunity to validate these concepts during the hands-on session. Real World Endo remains dedicated to the preservation of the natural dentition. Let’s save some teeth!!!

During this lecture/hands-on participants will:
1. Learn the biologic basis of success and practical clinical tips and tricks to improve success.
2. Recognize the various applications of fiber-optic ultrasonics in endodontics.
3. Understand the use of the very efficient ESX® NiTi rotary file and instrumentation and obturation system.
4. Understand the term “Hydraulic Condensation” and its application during obturation.
5. Gain insight into the use of the new bio-ceramic materials in both surgical and non-surgical endodontic care.
6. Become familiar with a novel and very efficient (drillless) post and core preparation technique.

Please bring a file sample from your current rotary system to compare to ESX (a size 35 is ideal). In addition, any accessed, extracted teeth you may want to work on.
REGISTRATION

Name

Staff Names:

Course Fees: (lunch included)

Friday, Dr. Fazio
Tuition AGD Members ...........................................$295.00
Non AGD Members ............................................$445.00

Saturday, Dr. Pulver
Tuition AGD Members ...........................................$250.00
Non AGD Members ..............................................$350.00

Friday and Saturday, Both days
Tuition AGD Members ...........................................$445.00
Non AGD Members ..............................................$695.00

Payment:
Check # ____________________________
Credit Card # ____________________________________
Expiration Date _____________________
Signature ________________________________________

Once registered for the event there are NO REFUNDS. Cancellation will result in credit toward future IAGD course.

CE Course Categories:
For FAGD, MAGD Candidates
Friday - 8 Hr Lecture - Oral Medicine/Pharmacology
Saturday - 4 Hr Lecture - 4 Hr Hands On Endodontics

Registration Inquiries:
Shannon Gossett-Webb, #317-979-8636
Mail Registration: IAGD, c/o Shannon Gossett-Webb
1331 Middleham Lane Beech Grove, IN 46107
Fax Registration: #317-786-3538
